

Multi-Purpose Transparency Film

Multi Purpose Transparency Film

This multi purpose transparency film was developed for use on **copiers, laser printers and inkjet printers**.

This product is manufactured with specifically designed coatings on a clear polyester base which gives professional looking, high quality color images, with strong vibrant colors. It is designed to work on xerographic and inkjet technologies with optimum results.

Features:

- Standard 8 1/2" x 11" size (100 sheets per box)
- 4.4 mil clear heat stabilized polyester film
- 'Truly' Universal transparency film
- Reliable feed from multipurpose tray
- Good color transmission on overhead projection, with low loss due to scatter
- Asymmetrical image side designed to be resilient in xerographic & inkjet technology
- Two-sided coat with toner receptive coatings & inkjet receptive one side anti-static coated on back side to optimize stream feeding
- Good toner adhesion
- Strong vibrant colors
- Fast drying and resistant once dry.

Imaging: Image on the "rougner" side of the film. This is easily determined by touch. (Please note: Most HP inkjet printers require the film to be loaded with "image side down" in the paper tray. Most Epson and Canon inkjet printers require the film to be loaded "image side up" in the paper tray.)

Handling: Always handle at the edges if possible

Storage: This product should be stored in temperatures between 50 to 89 degrees F with relative humidity between 30% to 70%
